CYBERSECURITY: FAMOUS INCIDENTS & PRIVACY

FAMOUS INCIDENTS:

PAGE 1: INTRODUCTION AND THE EARLIEST FAMOUS INCIDENTS: Introduction about what the next pages will talk about. Why/when/how cybersecurity incidents. Explain 1 or 2 early cybersecurity incidents and their importance.

PAGE 2: EVOLUTION OF CYBERSECURITY INCIDENTS: How attacks/breaches changed in sophistication, scale, technology, motivation and complexity.

PAGE 3: MAJOR DATA BREACHES: Explain in detail the Yahoo data breach, the Equifax data breach, and other significant information theft incidents. For each incident follow the structure: Background, how it happened and what made it significant.

PAGE 4: RANSOMWARE AND DESTRUCTIVE ATTACKS: Explain in detail The WannaCry ransomware attack, NotPetya and the differences between them. For each incident follow the structure: Background, how it happened and what made it significant.

PAGE 5: CYBERESPIONAGE & CYBER SABOTAGE: Explain in detail Stuxnet, Duqu and Flame and their different objectives. For each incident follow the structure: Background, how it happened and what made it significant.

PAGE 6: DDoS ATTACKS AND BOTNETS: Explain what they are, how do they work and analyze the Dyn attack carried out using the Mirai botnet and explore the Aisuru attack and its difference with the Dyn.

PAGE 7: CONSEQUENCES OF CYBERSECURITY INCIDENTS: Explain in detail the consequences of Cybersecurity incidents, the different types of damages they cause. Compare financial damage, service disruption and effect on society. Do not repeat the specific cases from the other pages.

PAGE 8: WHO DETECTS AND RESPONDS TO AN INCIDENT: Explain in detail incident response teams, cybersecurity analysts, investigators and the stages of handling an incident. What happens after an incident is detected.

PAGE 9: CYBERSECURITY TODAY: THE PHP2Shell Vulnerabilities (October 2026 case): Explain in detail the case (it is not an incident but it was a high risk threat), and explain the possible consequences, global impact and reflect on the possibility that cybersecurity incidents affect us and there might not be an end to them.

MELIS: Pages 1, 2, 5, 9
BORA: Pages 3, 4, 7, 8
CARLO : Page 6

PRIVACY:

PAGE 1: INTRODUCTION: What is Privacy in the context of Cybersecurity and why is it important. Difference between privacy, security and anonymity, and what is personal data.

PAGE 2: DIGITAL FOOTPRINTS, COOKIES AND TRACKERS: Explain in detail what are they, why do they matter, the types of footprints and browser fingerprinting.

PAGE 3: DATA BROKERS, DATA MINING & DATA SELLING: Explain in detail how they work, motivations and business models, and legal status. Clearly explain the differences between collecting data, analyzing it and selling it.

PAGE 4: PRIVACY LAWS & REGULATIONS: Explain in detail various important privacy laws and regulations. Explain and compare GDPR and Switzerland's FADP in terms of rights and responsibilities.

PAGE 5: VPNs: Explain in detail what are they, how do they work, limitations and misconceptions and how their legal status varies depending on legislation.

PAGE 6: CRYPTOGRAPHY & ENCRYPTION: Explain in detail, what is it, how does it work, purpose, how is it used, who uses it, different types of encryptions, symmetric vs asymmetric and end-to-end encryption (Explain the distinction between them).

PAGE 7: BIOMETRICS, FACIAL RECOGNITION AND PRIVACY: Explain how biometric information is collected, stored and used, including facial recognition, fingerprints and surveillance. Do NOT explain how it works, just the privacy implications.

PAGE 8: PRIVACY FOCUSED BROWSERS: Explain what the difference between a privacy-focused browser and a day-to-day browser is. Explain in detail TOR browser and Mullvad (or Brave) browser.

PAGE 9: SOCIAL NETWORKS: Explain in detail the before and after the appearance of Social Networks, how social networks changed personal-data sharing and privacy. (Don't focus on minors, parental consent, etc. since that is on the next page)

PAGE 10: CHILDREN'S DIGITAL PRIVACY: Explain in what it consists of and the high importance it. Explain connected toys and applications, consequences and discuss parental consent, children's autonomy and their right to privacy.

PAGE 11. THE DIGITAL PRIVACY DILEMMA: Present and reflect about the tension between privacy, business models public safety, surveillance and individual rights.

FRANCESCO: Pages 1, 2, 3, 8
TOMMASSO: Pages 4, 5, 6, 9
CARLO : Pages 7, 10, 1

TOTAL : 20 Pages
